EDUCATION

Bal Bharati Public School

Class X CBSE Boards - 97 percent, Class XII CBSE Boards (PCM) - 95 percent

Pitampura, New Delhi

2011–2025

Indira Gandhi Delhi Technical University for Women

BTech in Computer Science Engineering, CGPA - 9.33/10

Kashmere Gate, New Delhi

2025 – 2029

EXPERIENCE

Technical Coordinator at Protégé IGDTUW

November 2025 – Present

Mentorship Society of IGDTUW

IGDTUW

- Developed key UI components for society web platforms using React (Vite) and deployed via Vercel.
- Designed and implemented the homepage (About, Plan of Action, Gallery) for the Protégé website, improving content structure and user engagement.
- Explored ways to visualize GitHub collaboration in a classroom setting

SheFi Season 16 Scholarship

March 2026 – Present

SheFi

- Selected for SheFi Season 16, a global scholarship program focused on blockchain, Web3, and decentralized finance (DeFi).
- Gained foundational knowledge of Ethereum, smart contracts, and DeFi through structured learning modules.
- Participated in workshops and engaged with a global community of learners and builders.

Open Source Contributions

August 2025–January 2026

Open Source India, GSSOC, SWOC

- Contributed to open-source projects through programs like Open Source India, GirlScript Summer of Code and Social Winter of Code
- Collaborated with developers to work on real-world codebases, including bug fixes and feature enhancements.
- Used Git and GitHub for version control, pull requests, and code reviews in a collaborative environment.

PROJECTS

TrashData | Kotlin, Android SDK, Android Studio

January 2026 – April 2026

- Developed an Android file cleaner app to detect and manage junk files, including old, large, and duplicate files using MD5 hashing
- Implemented background storage scanning with WorkManager, featuring progress tracking and completion notifications
- Integrated AI-powered keyword tagging with Groq (Llama) for smarter file categorization, with offline fallback support for reliability
- Built search, filtering, categorized file views, and storage analytics visualization using MPAndroidChart
- Used PDFBox for document text extraction and OkHttp for efficient API communication

NutriShakti | React.js, Next.js, Node.js, Express.js, MongoDB

October 2025 – December 2025

- Selected as a Finalist (Top 20 teams) at Tech Seva Hackathon by Eli Lilly, held at BITS Pilani Hyderabad Campus, for NutriShakti
- Developed a full-stack web platform providing personalized meal and fitness plans based on user goals, lifestyle, and dietary preferences
- Designed dynamic meal planning with local, seasonal, budget-friendly ingredients and integrated personalized home workout recommendations based on user goals, health conditions, and equipment availability
- Implemented user preference handling for dietary restrictions, allergies, and cultural considerations while building scalable backend APIs and managing data efficiently using MongoDB

TECHNICAL SKILLS

Languages: Python, C/C++, Kotlin, SQL (Postgres), JavaScript, HTML/CSS, R

Frameworks: React, Node.js, Next.js, Express.js, Flask, FastAPI

Developer Tools: Git, Vercel, Google Cloud Platform, VS Code, Android Studio, Visual Studio, PyCharm

Libraries: pandas, NumPy, Matplotlib
